I agree. Might be interesting once they get readings from the TMPs to request real time information that all have access to. Lucky for Greg this will be Linda's request.

**Subject:** Update on GES unit operation at Pond 15S SW standpipe

Greg: On Sunday (10/26), PH3 source gas readings above 20,000 ppm were recorded for the GES units operating at the SW standpipe at Pond 15S. The average for 10/26 was about 21,330 ppm. A weather front crossed the area on the evening of 10/25 and barometric pressure bottomed at about 25.3 inches Hg at about 10 pm. As of the first three 2-hour readings at noon today (10/27), the Pond 15S SW standpipe GES unit source gas readings were averaging about 12,200 ppm.
